## **Fixed Satellite Service (FSS) Market in North America 2015-2019**

**MarketResearchReports.Biz announces addition of new report "Fixed Satellite Service (FSS) Market in North America 2015-2019" to its database.**

### **About FSS**

An FSS is a type of satellite service that uses geosynchronous satellites for broadcasting purposes, such as TV and radio, telecommunications, and satellite communication. The major end-users of FSS are

government, military organizations, small and large enterprises, and others. This satellite service helps provide a valuable source of information to national intelligence and security organizations to reduce crime and terrorism. The service is categorized into two major types: wholesale service and managed service. The satellites used for FSS have a low power output, and they require larger dish-style antennas for reception. FSS works on three bands: C-band, Ku-band, and Ka-band.

Technavio's analysts forecast the FSS market in North America to grow at a CAGR of 0.76% over the period 2014-2019.
